

§ 1079.75 Plant location adjustments for producers and on nonpool milk.

(a) The producer price differential for producer milk pursuant to § 1079.61 received at a pool plant or diverted from a pool plant shall be reduced according to the location of the plant of actual receipt at the rates set forth in § 1079.52.

(b) For purposes of computations pursuant to §§ 1079.71 and 1079.72 the producer price differential shall be adjusted at the rates set forth in § 1079.52 applicable at the location of the nonpool plant from which the milk was received, except that the adjusted producer price differential shall not be less than zero.

[60 FR 57164, Nov. 14, 1995]

§ 1079.76 Payments by handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1079.30(b) and 1079.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition of fluid milk products in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any

other payment obligation under any order;

(3) Subtract the pounds of reconstituted milk that are made from nonfluid milk products and which are then disposed of as route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the amount by which the Class I differential price exceeds the producer price differential, both prices to be applicable at the location of the partially regulated distributing plant, with the difference to be not less than zero; and

(5) Add the amount obtained from multiplying the pounds of labeled reconstituted milk included in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant less \$1.00 (but not to be less than the Class III price) and the Class III price. For any reconstituted milk that is not so labeled, the Class I price shall not be reduced by \$1.00. Alternatively, for such disposition, payments may be made to the producer-settlement fund of the order regulating the producer milk used to produce the nonfluid milk ingredients at the difference between the Class I price applicable under the other order at the location of the plant where the nonfluid milk ingredients were processed (but not to be less than the Class III price) and the Class III price. This payment option shall apply only if a majority of the total milk received at the plant that processed the nonfluid milk ingredients is regulated under one or more Federal orders and payment may only be made to the producer-settlement fund of the order pricing a plurality of the milk used to produce the nonfluid milk ingredients. This payment option shall not apply if the source of the nonfluid ingredients used in reconstituted fluid milk products cannot be determined by the market administrator.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1079.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:
